

I am writing you to urge you to block the merger of EchoStar - DirectTV.

As a consumer I fear the creation of a monopoly in the satellite industry. This merger will only benefit the merged companies and reduce choice for consumers all over the United States.

The consumer will benefit only when consumer has choice, and when satellite companies compete to serve the consumer.

Please accept my consideration for the blocking of the EchoStar-DirectTV merger

Thanks

Wasim Manasfi

I urge you to block the merger between EchoStar and DirectTV that will create a monopoly in 30% of the US, and reduce choice for all consumers. Consumers should have choice for their essential TV service. Consumers need choice and the service of competing satellite companies.
