

I write today in support of the merger between Echostar and Hughes. I live in an area of Pennsylvania which has only one cable company. For more than ten years I paid for service that never got better but always became pricier. Since getting Dish Network I have better service, more choices and lower prices than before. I also look forward to the ability to get broadband coverage since my local mom and pop telephone company is not trying to accomodate me or my neighbors. I look forward to the merger so that I can see my local TV stations. However, it is not that important to me, it should be for you since I never hear about the good things you do for me as my Senators and Representatives.
