

The FCC should NOT, I repeat should NOT let Dishnetwork merge with Direct Tv. Dishnetwork is looking to create a monopoly in the Satillite Television market that could be worse than that of some cable markets. Dishnetworks customer support is horrible and they do not give people of certain area's of the United States the chance to view networks that are vital to their region. For this reason I urge all of congress to vote NO in regard to this merger. Two companies at least gives you a choice of what to view. One company gives you NO choice and no competative pricing!
