

I hereby OPPOSE the merger between Echostar and DirectTV due to the fact it would create a monopoly and severely limit choices of consumers. I am also an installer of satellite dishes and shudder at the thought of how a giant satellite TV company would be run by Charlie Ergen. He is anti-labor, anti-consumer and would send quality installations for consumers right out the window by hiring \$5.00 per hour installers just for the sake of making more money. Please do not let them merge! Thank you!
