

I would like to see the merger of dish network and Direct TV approved quickly. I have been a dish network subscriber for 4 years. The merger would get the sports packages on dish network, currently only available on direct tv. One system would be better for all satellite customers. Give us more channels and choices.

Please pass legislation requiring all channels carried on cable be available to satellite subscribers. Example in the Washington, D.C. area Newschannel 8 is only available on cable. Should be available on dish network too.

I don't like the idea of market areas. People should be able to get all the stations, from all the cities in the United States without Blackout Restrictions.

Thanks
Patrick
