

I am writing this letter to inform you that I am in support of the Echostar/Direct TV merger. I feel this merger is for the benefit of the consumers who will be subscribing to the their programming. I feel that there are other positives to this merger. For one thing, the ability to receive high speed internet access. Personally I do internet access, but I am limited to basic internet service; I do not have access to high speed access. Local channels are also a major concern to dish subscribers, with this merger all subscribers will have access to local channels. I have local channel access and it is very good. I have a quality picture and sound which I feel that cable is not able to offer me. Thank you for time. Please support the DishNetwork/Direct TV merger.
