

please take my advice and push to approve the merger of echostar and direct tv we want competition to cable and baltimore locals for echostar customers , we have been passed over on locals for years now and we feel we deserve them at a far better price than cable can deliver them. the ravens won the superbowl and baltimore stations want badly to be up on echostars birds!!this is america and we as a free people are privileged to choose tv providers and this merger will benefit all americans urban and rural, take heed on this vital domestic issue, thank you for your time and vote to approve the merger.
