

I am writing you today to support the merger of Dishnetwork and Directv. I have had Dishnetwork for three years now and I can not get my local ABC station because I live 45 miles from the station. The ABC station will not give me a waiver so I could get the New York station and I can not afford on of the 50 foot anntenas to get it. I think this would be good for the people who can not get cable so we also would be able to get the local station of our NBC, CBS, ABC and FOX. Like I said I have been with dish 3 years now and there rates have only went up about 2 dollars. When I live in the city and had Cox Cable there rates went up every year. I had cable for 4 years and it went up at least 10-12 dollars in the 4 years on was with it. This merger will help keep the rates low for everyone and would also lower there high speed internet that they offer. Thank you for your time.
