

I can't express enough how strongly I want to see this merger take place. It can only benefit the consumer. What has been seen in the past is that the Gov't attempt to avoid monopolies in order to promote competitiveness and keep consumer prices down have not worked in the communication field. Cablevision prices have gone up as a result of this and a great case and point are phone rates in the NY area since Ma Bell was broken up in the mid 80's. Phone costs went crazy. Please, Please, Please allow this merger to take place. It will offer the american people the best choices and save us money over cable subscription.
