SUMMARY

Estimated Average Burden Hours Per Response: 153 hours

This document provides the Report Definition for FCC Report 43-04, the ARMIS Access Report, and lists the jurisdictional separations and access charge data, which must be provided annually for each study area.

The ARMIS 43-04 Report contains the following:

	<u>Pages</u>
General Instructions.....	1 - 3
Table I - Separations and Access Data .....	4 - 10
Allocation Reference Table .....	11
Row/Column Instructions .....	12 - 31

When errata occur, carriers must include in the transmittal letter a brief statement indicating the reason for the errata. Other explanatory notes must be included in the footnote section of the filing.

**NOTICE:** The ARMIS Access Report collects the results of the jurisdictional separations and access charge procedures as specified in Parts 36 and 69 of the Commission’s Rules. The ARMIS Access Report specifies information requirements in a consistent format and is essential to the FCC to monitor revenue requirements, joint cost allocations, jurisdictional separations and access charges. Your response is mandatory.

The public reporting for this collection of information is estimated to average 153 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0511), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to [jboley@fcc.gov](mailto:jboley@fcc.gov). **PLEASE DO NOT SEND YOUR RESPONSE TO THIS ADDRESS.**

**Remember - You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0511.**

**General Instructions**

1. Items that need not be reported because they do not apply are designated by N/A. DO NOT override N/As. If a reporting carrier should wish to apply data to a field containing an N/A, the carrier must enter the amount(s) and an explanation as a footnote to the field. The amount(s) must not be entered in the N/A'd field. All other fields must be populated. If there are no data applicable to a given field, enter zero.
2. Reporting carriers must follow the specific instructions provided in the attached Column Descriptions and Row Instructions. In addition, carriers must follow the jurisdictional separations and access charge procedures set forth in Parts 36, 65 and 69 of the Commission's Rules and referenced in the Row Instructions. Carriers must explain any deviations in footnotes. Do not include explanatory notes in the transmittal letter; such notes must be included in the Footnotes section of the filing as indicated in the Automated Report Specifications.
3. In order to preserve its linear integrity, adjustments to accommodate reallocation of common power costs in Part 36 from the assignment method in Part 32 must be completed before entering data in this report. If these adjustments are not made prior to entering the data in this report, columns (i) plus (n) plus (o) plus (q) plus (r) will not equal column (d) for Rows 1112 through 1410.
4. When reporting investment amounts for Plant, Other Investment, and Reserves, use the same averaging methodology as instructed for the ARMIS Report 43-03. When reporting Revenues, Expenses, Taxes, Return (except rate of return), and Revenue Requirement data, carriers must provide the total annual data or the sum of monthly, quarterly, or semi-annual studies. When reporting allocation factors, carriers must report data as follows: (1) usage amounts, such as minutes, should be reported as total annual data or the sum of monthly, quarterly, or semi-annual studies that represent the total usage for 365 days. For example, seven-day studies must be projected to reflect each month's total usage for a total of twelve months; (2) expenses or revenues, when used as an allocation factor, should be reported as total annual data or the sum of monthly, quarterly, or semi-annual studies; (3) allocation factors such as weighted standard work seconds should be reported as total annual data or the sum of monthly, quarterly, or semi-annual studies; and (4) kilometers should be reported as a weighted annual average.
5. All data must be reported "as earned," i.e., after adjustments to prior periods and SNFA adjustments.
6. If an entry is to be a subtraction, indicate so by placing a minus sign in the column immediately preceding the numeric data, e.g., use -4, NOT - 4 or (4) for the data disk file.
7. Investment, Reserve, Revenue, and Expense amounts are allocated between jurisdictions and/or among access categories and elements on either (1) time/distance-sensitive usage allocators, (2) the non distance-sensitive flat allocator, or (3) the distribution of related account(s). To avoid redundant appearances of these rows, these allocators only appear as a row in the form the first time they are used. Henceforth, amounts to be allocated are cross-referenced with the appropriate allocator row in the Allocation Reference Table immediately

following the form. The symbol “#” preceding the applicable row description would indicate items that are not dollars or percentages (e.g., minutes of use, conversation minutes, minutes-of-use-kilometers, etc.). The symbol “%” in the row instruction would indicate items to be entered as a percent (e.g., rate of return).

8. In cases in which the total interstate amount of the cost category is directly assigned pursuant to Part 69, the Part 69 data must be reported on the total row for that category as indicated in the row instructions for the total row. All Part 69 amounts for a cost category must equal the total of the amounts allocated to the interstate jurisdiction for that category.
9. All terms and abbreviations used in the report and instructions are defined in Section 69.2 of the Commission’s Rules, the Glossary of the Separations Manual, and Part 36 of the Commission’s Rules.
10. All dollar amounts must be rounded to the nearest thousand. Amounts of minutes (including, but not limited to, conversation minutes, tandem minutes, and dial equipment minutes) must be rounded to the nearest million. All seconds including weighted standard work seconds must be rounded to thousands. All conversation-minute-kilometers must be rounded to the nearest million, and all minutes-of-use kilometers must be rounded to the nearest thousand. All rate-of-return amounts must be entered in percent and must be rounded to 2 decimal places (e.g., 23.70561 should be entered as 23.71).

## A. **Introduction**

This document contains the detailed automated data processing (ADP) specifications for the automated report to be filed as FCC Report 43-04, the ARMIS Access Report.

## B. **General Format**

### 1. **Electronically-Filed Data**

- a. For data reporting years 1990 and beyond, carriers must file their ARMIS Reports and related documents electronically. Electronic submission of both is made through the Internet by selecting the “**Upload ARMIS Data Site**” link on the EAFS Home Page, at <http://www.fcc.gov/wcb/eafs/>.
- b. All files must be coded in ASCII. Header records in the ARMIS Report data files must include the report number, company, study area, period, COSA code, version, and submission number. A higher number (2, 3, etc.) and a new data entry date must be used each time a change occurs to denote a new submission.
- c. A separate ASCII file must be prepared for each report. More than one ASCII file can be included in the same electronic upload file – which is created by the data validation program – as long as they are for the same report and cover the same period and version (different submission numbers and multiple reasons for correcting data are allowed).
- d. The electronic submission will serve as the carrier’s official filing.

### 2. **ASCII File Name** – each file has six components:

- a. the four letter COSA code (CO = Company, SA = Study Area, see the COSA Code Table for a list of companies and their respective COSAs)
- b. the last two digits of the year which is covered by the data
- c. the letters “AC”
- d. a decimal point
- e. the letter “P”, “C”, or “U” to indicate whether this is the Public version, the Confidential version, or the Unrestricted version
- f. two digits (zero filled) for the submission number: Submission 00 is for test data purposes only; Submission 01 is for the first submission of a year’s data

For example, the file name for the Unrestricted Version of the initial Access Report data file to be submitted by Illinois Bell to cover the calendar year 2007 would be LBIL07AC.U01:

LBIL	COSA for Illinois Bell
07	Data for calendar year 2007
AC	Access Report data file
.	Decimal point
U	Unrestricted version
01	First submission of this year's data

### C. **Filing Requirement**

1. **Proprietary Treatment:** Carriers seeking proprietary treatment for some data must provide two electronic versions of the automated report. The Confidential Version must contain all the required information. Confidential Treatment Data Records **must** be provided to identify confidential data but are not a substitute for applying for confidential treatment with this Commission following established Commission procedures. The Public Version **should neither** include data for which the carrier is seeking proprietary treatment nor Confidential Treatment Data Records.

Carriers not seeking proprietary treatment for any data should provide only one electronic version which should be identified as the Unrestricted Version.

2. **Data Items That Are "Not Available," "Withheld," or Are "Irretrievable"** – See Sections B and C of the Reporting Procedures for a discussion of the Confidential Version, the Public Version, and the Unrestricted Version of this report and for a definition and discussion of data items that are "Not Available," "Withheld," or are "Irretrievable."
3. **Related Documents** – These documents are required by Commission Order to be filed with specific ARMIS reports. The electronic submission of these documents must be converted to Adobe Acrobat's Portable Document Format (PDF), prior to submitting the documents to the Commission.

**Document Conversion Requirements:** Convert directly through a word-processing application or through the use of a scanning device. Other than a letterhead graphic, the documents to be converted should consist of text only—no graphics. Conversion of a document to PDF should result in a black and white document with a resolution no greater than 300 dpi, and having a file size no more than 40 to 50 Kb per page.

The related documents to be included in the electronic upload file for Report 43-04 are described below:

- a. **Transmittal Letter** – Each ARMIS report submission must be accompanied by a letter of transmittal. When filing confidential data, a separate letter is required. These letters must be on official company letterhead and be included in each electronic upload file.

The transmittal letter must list **only** COSAs included in the submission. See Section G.2 of the Reporting Procedures for a description of the information to be provided in the transmittal letter.

- b. **Data Certification Statement** – Carriers must certify the accuracy of the data submitted in the ARMIS Reports by including one certification statement, signed by a corporate officer, in each electronic upload file. The certification statement must list **all** COSAs required for a specific ARMIS report. See Section G.3 of the Reporting Procedures for a description of the information to be included in the statement.

#### 4. **Data Validation Programs**

- a. Each reporting carrier must validate its data by using the most recent edit check program(s), provided by the Commission, for the reporting year. When an error is detected, the carrier must correct the error prior to submitting the report to the Commission.
  - b. The edit check program creates the electronic upload file to be used as the carrier's official filing. It will normally contain the following:
    - 1 The ASCII file(s)
    2. Text files that will be stored in the database
    3. The edit check results (“the Discrepancy Report”)
    4. The comparison utility results for roll-up comparisons (“the Detailed Error Report”)
    5. Related documents – one each per upload file, when applicable – in PDF
5. **Upload Comment Field:** Enter the reason for the filing, which must include a brief description of ALL data (including footnotes) that have been added, removed, or modified since the previous submission. This description must agree with what is being filed. The comments should not contain references to IATD letters. Maximum comment length is 245 characters (including spaces). If comment length will exceed 245 characters, include in the comments a reference to the associated transmittal letter by its date, for additional information.

#### D. **Data Entry Conventions**

1. Give each record a unique record number, beginning with 1001 and incrementing by one, with no numbers skipped.
2. Begin each data record in column 1 and make each record the proper length as specified in the record layouts. Commas are used as delimiters between fields. All numeric fields are right justified and space filled, e.g. use   123, NOT 123. All non-numeric fields are enclosed in double quotation marks and are left justified and space filled within these quotation marks, e.g. use “John Doe  ”.

3. If an entry is to be a subtraction, indicate so by placing a minus sign in the column immediately preceding the numeric data, e.g., use -4, NOT - 4 or (4).
4. Do NOT include “\$”, “%”, embedded commas, decimal points, quotes or other formatting characters in any numeric data fields, except for row numbers and percentage fields, which will include a decimal point but not a percent sign.
5. In any numeric data field designated by N/A, enter -99999. In any text data field designated by N/A, enter “N/A”. If a “Public Version” is filed, enter -88888 in any numeric data field and “W/H” in any text data field for which data are “Withheld” to indicate that confidential treatment has been requested. These entries must be formatted according to the format rules for the particular data field; e.g., in the percentage fields, -99999 is entered as -99999.00 and text fields are enclosed in double quotation marks.
6. Do not override designated N/As. However, if a reporting carrier wishes to apply data to a field containing a N/A, the carrier should enter as a footnote to the field, the amount(s) and an explanation. The amount(s) **must not** be entered in the N/A field. All other fields must be populated. If there are no data applicable to an open field, enter zero.

#### E. Rounding Conventions

1. As specified in the Report Definition, all dollar amounts must be rounded to the nearest thousand.
2. Amounts of minutes (including, but not limited to, connection minutes, DEMs and MOU) must be rounded to the nearest million.
3. All seconds including weighted standard work seconds must be rounded to thousands.
4. All conversation-minute-kilometers must be rounded to the nearest million.
5. All minutes-of-use kilometers must be rounded to the nearest thousand.
6. All rate of return amounts must be entered in percent and must be rounded to 2 decimal places (e.g., 23.70561 percent must be entered as 23.71). All other percentage amounts must be entered as in the following example and rounded to 4 decimal places.

Example:        23.70561 percent must be entered as 23.7056

**F. Footnotes****1. General:**

- a. For initial (annual) filings, if any data for the current period differ materially from those for the previous period and the difference is not self-explanatory but was caused by unusual circumstances, the carrier must include detailed footnote text to explain the specific circumstances. For resubmission filings, footnotes must be provided for all changed data, which includes changed footnotes. When a summary row value changes because of changes to one or more of its detail rows, the summary row must also be footnoted.
- b. Footnotes should be filed for the entities to which they apply: a footnote might apply to a holding company COSA only, to a study area COSA only, or to both entities. (However, footnotes should not be submitted at the holding company level if they apply only to a company's study areas.)
- c. If the reporting carrier does not follow the procedures described in the row and column instructions of the applicable Report Definition, it must explain any deviations from those procedures in an explanatory footnote. Such footnotes must provide detailed explanations of the procedures actually used by the carrier and its specific reasons for deviating from procedures prescribed by the Commission's Rules. This provision should not be interpreted to mean that deviations from the prescribed rules will automatically be approved by the Commission. See Section E of the Reporting Procedures for examples of valid footnotes.
- d. Footnote entries must provide detailed explanations for only those items reported in the current submission. Footnotes from prior submissions should be included only if they remain applicable. In other words, when a resubmission nullifies an existing footnote, remove the footnote.
- e. The footnote text must be included in the Footnote Text Records.

2. **Mandatory:** Certain items require accompanying footnotes and those items are specified in the appropriate section of the Report Definition for filing the reports. Such footnotes are mandatory and must be entered in the Footnote Text Records.

**3. Footnote Structure:**

Observe the footnote specifications to the letter and strive for an efficient footnote structure. Reduce the size and number of footnotes by using global and referring footnotes.

### Global Footnotes

- a. If a footnote applies to an entire table, its row number is 9999.0, and its column letter is ZZ;
- b. If a footnote applies to all columns within a single row, its column letter is ZZ;
- c. If a footnote applies to a single column within all rows, its row number is 9999.0;
- d. If a footnote applies to a majority of (but not all) columns within a single row, its column letter is ZZ, and its text should include the identity of the columns to which the footnote applies;
- e. If a footnote applies to a single column within a majority of (but not all) rows, its row number is 9999.0, and its text should include the identity of the rows to which the footnote applies;

### Referring (non-Global) Footnotes

- f. If a footnote applies to more than one, but less than a majority of rows or columns, use individual referring footnotes for the rows or columns to refer to a single explanatory footnote. The referring footnote must include the explanatory footnote's number, row, and column;
- g. Referring footnotes and the footnotes to which they refer should be in the same table.

### Footnote Removal

- h. For resubmissions, remove footnotes if they no longer apply, and renumber the remaining footnotes.
- i. When removing one or more footnotes from a table that were erroneously included in a previous filing, provide a single explanatory footnote that includes a list of the affected rows and columns. This footnote's record number for the footnoted data is 9999 (field 4), its table number is ZZZZ, its row number is 9999.0, and its column letters are ZZ.

## **G. Errata**

1. Carriers are under a legal obligation to correct any erroneous data, which includes footnotes, reported in ARMIS Reports. Thus, whenever there are changes in table data, footnotes are added, footnotes are removed because they were erroneously-filed, or the text of an existing footnote is changed, an erratum (and resubmission) is required. See Section B of the Reporting Procedures for the use of submission numbers when an erratum occurs.

2. Submissions containing corrected data must include references to indicate which data items were corrected since the previous submission. If the data items being corrected impact other data items in the report, then those items must also be corrected and referenced. Erratum references should reflect only those items corrected in the new submission. References from prior submissions must not be included in the new submission.
3. Current errata references must be included in the Erratum Record(s).

4. **Errata Structure:**

Observe the errata record specifications to the letter, and strive for proper structure.

- a. An errata record should reference more than one column, if multiple—but not all—columns are affected for the same row. (Where all columns are affected use “ZZ” as the column reference.)
- b. When a footnote column field contains “ZZ” to indicate multiple—but not all—columns, the errata record column field should not use “ZZ.” Instead, list the columns affected in this field.
- c. The errata record should reference the footnote number to which it applies.
- d. For Submission Number 3 or higher, be careful to clear the errata table of entries from previous filings, prior to adding new errata entries for the new submission.
- e. When removing one or more footnotes from a table that were erroneously included in a previous filing, the erratum record should refer to a single footnote explaining the removed footnote(s). In the erratum record, use 9999 for the record number of the corrected data (field 4), ZZZZ for the table number, 9999.0 for the row number, and ZZ for the column letters.

#### H. Data Record Descriptions
