 )  
Policy and Rules Concerning Rates ) CC Docket No. 87-313  
for Dominant Carriers )  
 )  
 )

ERRATUM

Released: June 25, 1991

1. On May 17, 1991, the Common Carrier Bureau released a Memorandum Opinion and Order in this docket, pertaining to service quality and infrastructure development monitoring for local exchange carriers (LECs) under price cap regulation.<sup>1</sup> That Order should be corrected in the manner described in the following paragraphs.

2. At Attachment B, page 4, the last sentence of the first full paragraph is deleted. That sentence states: "LECs will file local residential and business installation intervals as well as the interexchange access installation intervals discussed above." This sentence is not consistent with the instructions for the applicable tables.

3. At Attachment C, page 12, the instruction for Row 0211 of FCC Report 43-07, ARMIS Infrastructure Report, is changed to read:

Row 0211 - Percent Total Switches - Enter the ratio of switches equipped for Touch-Tone to total local switches, in percent (row 0210 divided by row 0111).

This change will result in data that presents a more accurate representation of Touch-Tone deployment.
